

Performance Evaluation Metrics - In-Class Assignment

Objective: Learn to compute and interpret classification performance metrics.

Implement in Google Colab and submit as assignment

Scenario:

	Predicted Positive	Predicted Negative
Actual Positive	40	10
Actual Negative	20	30

Tasks:

1. Identify TP, TN, FP, FN.
2. Compute Accuracy, Precision, Recall, and F1-score.
3. Which metric is more important in this scenario? Justify.
